

THURNBY MEAD
PRIMARY ACADEMY

In our school, science is about developing our understanding, enjoyment and interest in science so that we appreciate the impact science has on our lives and the world in which we live.

“We ask questions, we investigate, we explore, we explain our thinking and encourage everyone in our school community to be inquisitive learners.”

At Thurnby Mead Primary Academy, staff and children believe that great science happens when...

- It is **fun** and **engaging**, and linked to the **real world**
 - Learning is **practical** and hands-on
- We are **all** involved in **discovering**, **exploring** and **investigating**
 - Lessons are **well organised** with enough resources
- We are **challenged** to ask our own questions, experiment and make our own predictions and investigations
 - We **celebrate** our learning and achievements and learn from our marvellous mistakes!
